RNZCGP domains of learning:

- 1. Communication
- 2. Clinical expertise
- 3. Professionalism
- 5. Context of General Practice

AUDIENCE: All primary care practice teams and PHO staff.

Poor oral health has adverse impacts across the lifespan with significant health inequities for our Pacific and Māori, CALD population, elderly population, people with Serious Mental Illness & addictions, and people with disabilities.

This webinar will:

- Describe oral health services available across the lifespan including how to access these services
- Identify oral health resources available in Canterbury
- Outline the bidirectional health effects of periodontal-systemic relationship
- Discuss the role for primary care in oral health – prevention, early recognition and intervention
- Outline the steps primary care providers can take to address oral health inequity.
